

Neurodevelopmental Community Hubs

South Derbyshire

WHAT DO WE OFFER?

- We offer peer support, accessible activity groups for children and young people that feel right for their level of need, and information about local groups.
- The staff will act as a 'guide on the side' to help users access the information and support they need
- Local professionals will signpost to the hubs to enable users to access advice, information, and support as early as possible.
- The Hub's will be working alongside with other services such as the SEND advice line, the ND portal on the Derby and Derbyshire Emotional Health and Wellbeing website and Derbyshire County local offers

WHO DO WE SUPPORT?

- There is no need for a specific diagnosis to access our services.
- The Neurodivergent Community Hubs are here to help children, young people, and their families who are pre or post diagnosis.
- Our hubs provide a range of advice, information, support, and activities in a safe environment that helps people feel part of a wider network.

NEURODIVERGENCE

Neurodivergence covers a wide spectrum of hidden neurological conditions such as Autism, Attention Deficit Hyperactivity Disorder, Foetal alcohol syndrome, dyslexia, dyspraxia, and social anxiety.
